Introduction

This report contains statistical profiles of Minnesota public school districts for the 1980-81 school year. It is the ninth annual issue in a series of statistical reports published by the Minnesota Department of Education.

The primary purpose of the report is to provide a convenient source of accurate and comparable school district data for a single school year. The report includes data on students, staff, revenues, expenditures, and other topics. These data may be used to compare districts and to assess their similarities and differences.

The contents of the report are explained below.

- This year's report incorporates many changes from the format and content of past issues. These changes are summarized on pages 4 through 6.
- Pages 7 through 10 contain an explanation of some trends and patterns shown by the data.
- Pages 11 through 13 contain definitions for the 38 statistics which are diplayed in the tables on pages 16 through 47.
- Pages 14 and 15 contain a list of all Minnesota school districts in alphabetical order, with their district, county, and region numbers. The map on page 15 shows the boundaries of the state's 87 counties and 13 development regions. This list and map may be used as a reference in finding districts in the tables that follow.
- The tables on pages 16 through 37 display 38 separate statistics for each of the 432 school districts which operated elementary and secondary schools during the 1980-81 school year. Districts are grouped by county based on the county in which the district offices are located. Counties are listed in alphabetical order and districts are in alphabetical order within each county.
- The tables on pages 38 through 43 display county, region, and state totals for the same 38 statistics included in the school district tables.
- A separate table, on pages 44 and 45, contains data for three districts which operated only elementary schools, and two districts which directly operated no schools.
- Another table, also on pages 44 and 45, displays totals for all districts in each of ten enrollment size categories. This allows easy comparison of districts which are similar in enrollment.
- The summary statistics table, on pages 46 and 47, displays the state total, highest and lowest districts, median value, and various percentile values for each of the 38 statistics included in the report.

Changes in the Report

Throughout the nine year history of this report the content has remained fairly constant, in order to permit comparisons over a period of years. However, this year's report incorporates many changes, some of them minor and others quite significant. Most of the changes were necessary because of a new financial reporting system, called the Uniform Financial Accounting and Reporting System (UFARS), which all school districts began using at the start of the 1980-81 school year. Other changes were suggested by readers who completed a survey form sent out with last year's report.

Format

If you've used past issues of this report, you've probably already noticed one change --the report is printed sideways this year. We've used this unconventional printing style because it allowed us to use larger type on the tables (see pages 16 through 47) while still printing the same amount of data for each school district on a single line across two facing pages. For example, all the figures for the Chaska school district are on the top line of pages 18 and 19.

We have also added horizontal shaded bars to the tables, to make it easier to follow the figures for one district across the pages. As in past years, county and district names and numbers are at the left edge of each left-hand page. District numbers are repeated at the left edge of each right-hand page.

Financial Data

The Uniform Financial Accounting and Reporting System (UFARS), which all school districts began using at the start of the 1980-81 school year, is a computerized system which combines financial budgeting, accounting, and reporting. One benefit of the system is that it provides much more detailed financial data than was previously available. For example, prior to 1980-81 all expenditures for instructional supplies were reported as a single figure. With UFARS, separate instructional supply expenditures may be reported for up to 48 different program categories.

Because of the switch to UFARS, it was impossible to retain the same expenditure categories used in the past issues of *School District Profiles*.

Thus, the sixteen expenditure categories in this report (columns 18-33) are very different than the sixteen categories in last year's report. However, we believe the new categories will be more meaningful and useful. For example, in 1979-80, 53 percent of all current expenditures were in the category "instructional salaries," which included salaries of all teachers, principals, curriculum consultants, guidance counselors, and several other groups of staff. In this year's report, these salaries are divided among six different categories (principals are included with "district and school administration"; teachers with "regular instruction," "vocational instruction," or "exceptional instruction"; guidance counselors with "pupil support services"; and most other salaries with "instructional support services"). The largest single category, "regular instruction," includes 44 percent of total operating expenditures.

Some of the expenditure categories are very similar to those used in past years. "Total K-12 operating expenditures (column 29) is essentially equivalent to what was called "total current expenditures" in past years. The categories labeled "food service" (#26), "pupil transportation" (#27), "community service" (#30), and "debt service" (#33), are also very similar in meaning to the corresponding categories in past reports.

The definitions on pages 11 through 13 provide a general explanation of what is included in each category. In addition, Table 1 shows the specific UFARS funds, programs, and objects included in each category.

The data on revenue percentages (columns 15-17), fund balances (columns 34 and 35), state and local operating costs (column 36) and long term debt (column 37), also come from the UFARS system, but for all of these variables the definitions and meaning are virtually identical to those used in past issues of *Profiles*.

Any of the financial data in this report should be used with caution. The UFARS system differs greatly from accounting systems which school districts used in the past; learning to use it properly has been a difficult process for almost everyone involved. For 1980-81 particularly, there were some inconsistencies in the ways that districts recorded revenues and expenditures.[1] For example, under UFARS standards principals' salaries are treated as administrative expenditures. Most districts followed this stan-

Table 1

Sources of Expenditure Data for *School District Profiles*

In the UFARS system, all expenditures are assigned codes which identify the fund, program, and object of the expenditure*. For this report, each expenditure category includes all expenditures within a defined set of funds, programs, and objects, as described in the table below. This table is intended primarily for persons who are familiar with the UFARS system and who wish to trace or verify the amounts reported for a specific school district. For further explanation of UFARS, and for definitions of specific funds, programs, and objects, see *Manual for Uniform Financial Accounting and Reporting System for Minnesota Schools*, Minnesota Department of Education, or contact the School Financial Management Section of the department, at (612) 296-9786.

Categories Used in the Report	Funds	Programs	Objects
18. District and school administration	1 and 9	1-99	
19. District support services	1 and 9	100-199	
20. Regular instruction	1 and 9	200-299	
21. Vocational instruction	1 and 9	300-399	
22. Exceptional instruction	1 and 9	400-499	All objects
23. Instructional support services	1 and 9	600-699	except 500-599
24. Pupil support services	1 and 9	700-799	and 910
25. Operations and maintenance	1 and 9	800-899	
26. Food service	2	All	
27. Pupil transportation	3	All	
28. Other operating programs	1 and 9	0, 500-599, & 900-999	
29. Total K-12 operating expenditures (this is the total of categories 18 through 28)	1,2,3 & 9	All	
30. Community service	4	All	
31. Capital outlay	5	All	All but 910
	1,2,3,4 & 9	All	500-599
32. Building construction	6	All	All but 910
33. Debt service	7	All	All but 910

Funds
1. General
2. Food Service
3. Pupil Transportation
4. Community Service
5. Capital Expenditure
6. Building Construction
7. Debt Service
9. Trust and Agency

Major Program Categories	
0	Districtwide (no specific program)
1-99	District and school administration
100-199	District support services
200-299	Regular instruction
300-399	Vocational instruction
400-499	Exceptional instruction
500-599	Community education
600-699	Instructional support services
700-799	Pupil support services
800-899	Sites, buildings, and equipment
900-999	Other programs

Objects	
500-599	Capital expenditures
910	Transfers to other funds

*The code may also designate the organization, finance, and course of the expenditure.

dard, but some districts reported principals' salaries as instructional expenditures, which is consistent with the accounting standards used prior to 1980-81. Another example is expenditures for employee benefits, such as health insurance and life insurance. Some districts included these expenditures in the same categories as the employees' salaries. Other districts reported all employee benefits expenditures in a separate category, with "other operating programs."

These inconsistencies do not affect the total expenditures reported by each district. Thus, it is probably safe to compare total K-12 operating expenditures (column 29) among districts. But for any of the more specific categories, great care should be used in comparing districts. For example, if district A reports higher administrative expenditures than district B, it may be because district A has more administrators or it may be because the two districts code their expenditures differently. Some inconsistencies of this type will always exist with any accounting system. But the consistency of the UFARS data should improve next year as standards are clarified and as people become more accustomed to the system.

New Features

Three new features have been added to this year's report.

- Column 13 of the tables contains a new variable -- the number of resident pupil units for each district. This figure was included because it is used as the denominator for columns 34, 35, 37, and 38, and because it is used in calculating each district's foundation aid payments and tax levy limitations.

[1]Department of Education staff contacted fourteen school districts for which the expenditure data appeared questionable, and obtained revised data for use in this report. In most cases, the problems were due to groups of expenditures being coded in the wrong programs. For these districts, expenditure data in this report may differ from other published data. The fourteen districts are Centennial, Chaska, Columbia Heights, Laporte, Lyle, Minneapolis, North St. Paul-Maplewood, Proctor, St. Paul, Stewart, Virginia, Wayzata, Winthrop, and Worthington.

- The table at the bottom of pages 44 and 45 is a new feature; it displays totals for all districts within each of ten size categories, based on total resident ADM. For example, the first line shows totals for all districts with 257 or fewer students and the last line shows totals for all districts with more than 3,775 students. The purpose of this table is to permit easy comparison of districts that are similar in enrollment.
- The summary statistics table, on pages 46 and 47, is greatly expanded over the version included in past issues of *Profiles*.

  This year's version includes the following statistics for each of the 38 variables included in the report:

  The ten deciles (10th, 20th, 30th,...90th percentiles)
  The quartiles (25th and 75th percentiles)
  The median
  The 5th and 95th percentiles
  The highest and lowest values
  The state total

Changes in Definitions

In addition to the changes in expenditure categories discussed above, definitions and calculation methods for several other variables were refined and improved, changing them slightly from last year's report.

- In computing "percent transported" (column 8), the total enrollment of the district was used as the denominator. In past years, the average daily membership had been used. The effect of this change is a slight decrease in the percent transported for most districts. For the state as a whole, the change decreased the figure by 4.5 percent.
- The "pupil-staff ratio" (column 10) was computed based on the average daily membership (ADM) of pupils served. In past years, the computation had been based on the number of pupils in membership on October 1. This change has no noticeable effect on the state total pupil-staff ratio, but it may have changed the ratio slightly for some school districts.
- "Total pupil units" (column 14) includes a new category of students -- nonpublic school students who attend the public schools part-time for specific classes or services. This change has little effect on the state totals, since these students make up only 0.2 percent of the state's total pupil units. However, in a few districts they make up a significant proportion of total pupil units. Since column 14 is also used as the denominator in computing expenditures per pupil unit (columns 18 through 33 and column 36), the effect of this change is to decrease slightly the expenditures per pupil unit in these few districts.
- A small technical change was made in the computation of "change in funds balance" (column 35). The effect of the change is to decrease the figure in column 35 by $20 to $30 for twenty school districts which received a special type of taconite payment.

If you have questions about the meaning of data in the report or the comparability of data among years, or if you would like copies of reports from previous years, please contact the Education Statistics Section, Minnesota Department of Education, 736 Capitol Square, St. Paul, Minnesota 55101, or telephone (612) 296-2400.

Trends and Patterns

This section of the report describes some important trends over the past nine years and some patterns of variation among districts.

Number of Students

Public school enrollment continued to decline in 1980-81, but at a somewhat slower rate than during the previous three years. Table 2 shows that the state total of resident average daily membership (ADM) was 751,373 students in 1980-81. Since 1972-73, resident ADM has declined by more than 152,000 students, or 16.9 percent. The rate of decline was greatest in 1978-79 and 1979-80. In 1980-81, kindergarten ADM increased for the first time since 1975-76, and the rate of decline in total ADM was the smallest since 1976-77.

Individual school districts varied greatly in total ADM. The smallest district (Humboldt, in Marshall County) had 97 students, and the largest (Minneapolis) had 40,203. Half of the state's districts had 700 or fewer students, and a quarter of the districts had 381 or fewer. However, most students were enrolled in relatively large districts; the largest ten percent of the school districts (43 districts with more than 3775 students each) enrolled nearly 54 percent of the state's students.

Minority Enrollment

The number of minority students enrolled in Minnesota public schools has increased sharply in recent years. Table 3 shows that minority enrollment increased from about 24,000 in 1971 to 45,000 in 1981, even though total enrollment decreased during this period. As a result, the minority percentage of total enrollment more than doubled, from 2.7 percent to 6.2 percent. Enrollment increased for all four of the minority groups shown in Table 3. However, most of the increase has been due to the large number of Asian immigrants who have moved to Minnesota, particularly within the last five years. Enrollment of Asian students grew from 1,610 in 1971 to 12,992 in 1981.

Table 2

State Totals* of Resident Average Daily Membership

School Year	Prekinder-garten**	Kinder-garten**	Elementary (Grades 1-6)	Secondary (Grades 7-12)	Total	Percent Change
1972-73		62,790	405,124	435,864	903,778	
1973-74		61,462	389,894	442,109	893,465	-1.1%
1974-75		62,794	373,544	448,310	884,648	-1.0%
1975-76		63,546	361,800	449,615	874,961	-1.1%
1976-77		61,040	352,072	443,852	856,964	-2.1%
1977-78		55,693	345,285	430,892	831,870	-2.9%
1978-79		53,524	336,444	413,348	803,316	-3.4%
1979-80	1,487	49,463	326,720	394,426	772,096	-3.9%
1980-81	1,450	51,282	319,096	379,545	751,373	-2.7%

*These state totals include all Minnesota resident students, including residents of the elementary and nonoperating districts listed on page 44. For this reason, the 1980-81 figures in this table are different from the state totals shown in the tables on pages 42 and 46.

**For years prior to 1979-80, ADM of prekindergarten students is included in the kindergarten totals.

Table 3

Enrollment of Minorities in Minnesota Public Schools, 1971-72 to 1981-82

(numbers in parentheses are percentages of total enrollment)

School Year	American Indian or Alaskan	Black	Asian	Hispanic	Total Minority
1971-72	8,933 (1.0%)	9,654 (1.1%)	1,610 (0.2%)	3,810 (0.4%)	24,007 (2.7%)
1974-75	11,035 (1.2%)	12,204 (1.4%)	2,722 (0.3%)	4,731 (0.5%)	30,692 (3.4%)
1977-78	12,345 (1.4%)	13,876 (1.6%)	6,113 (0.7%)	5,013 (0.6%)	37,347 (4.3%)
1980-81	10,846 (1.4%)	15,404 (2.0%)	10,920 (1.4%)	5,512 (0.7%)	42,682 (5.6%)
1981-82*	10,972 (1.5%)	15,713 (2.1%)	12,992 (1.8%)	5,378 (0.7%)	45,055 (6.2%)

All enrollment counts are based on the number of students in membership on October 1 of the school year indicated.

*Preliminary data

Although minority students made up 5.6 percent of the state's total enrollment in 1980-81, the minority percentage was over five percent in only 45 school districts, and over ten percent in only fourteen districts. These fourteen districts included Minneapolis (31.3 percent), St. Paul (25.7 percent), and several districts on or near Indian reservations in northern Minnesota.

Pupil-Staff Ratios

The state total pupil-staff ratio for 1980-81 was 15.2; this means that the public schools employed an average of one full-time professional employee for every 15.2 students. However, pupil-staff ratios varied greatly among districts. There were five districts which had ratios under 9.0, and eight districts which had ratios above 18.0, or more than twice as many students per staff member. In general, districts with low pupil-staff ratios have smaller classes than districts with high ratios, and more opportunity for teachers to work with students individually.

Column 10 of the table at the bottom of page 44 shows that, in general, small districts had lower pupil-staff ratios than large districts. For example, districts with 257 or fewer students had an average pupil-staff ratio of 11.6, compared to an average of 16.0 for districts with 3776 or more students.

Revenue Percentages

In 1980-81, 6 percent of the revenue of Minnesota school districts came from the federal government, 54 percent from the state government, and 40 percent from local taxes and other sources (e.g., interest, tuition, fees, gate receipts, and payments from other districts). Table 4 shows that these percentages have changed little in the past nine years. However, the percentage of revenue from the state was slightly nigher in 1980-81 than in the previous three years, and the percentage from local and other sources was slightly lower.

The state's school aid formulas are based partially on the amount of property valuation in each school district. Wealthy districts receive less revenue from the state than poorer districts, and must raise more revenue through local taxes. Thus, in 1980-81 there were 19 wealthy districts which received less than a third of their revenue from the state, and 55 poorer districts which received more than two-thirds from the state.

Operating Expenditures

The state total of K-12 operating expenditures for 1980-81 was $2075 per pupil unit. Table 5 divides this amount into eleven separate categories. These eleven categories may be further summarized as follows (see Figure 1).

9.1 percent of operating expenditures was for administration of the districts and schools (categories 18 and 19);

58.6 percent was for instruction of students (categories 20 through 23);

15.7 percent was for other services delivered to students, including food service (category 26), transportation (#27), and pupil support services (#24);

10.6 percent was for operations and maintenance (category 25);

6.1 percent was for other operating programs (category 28).

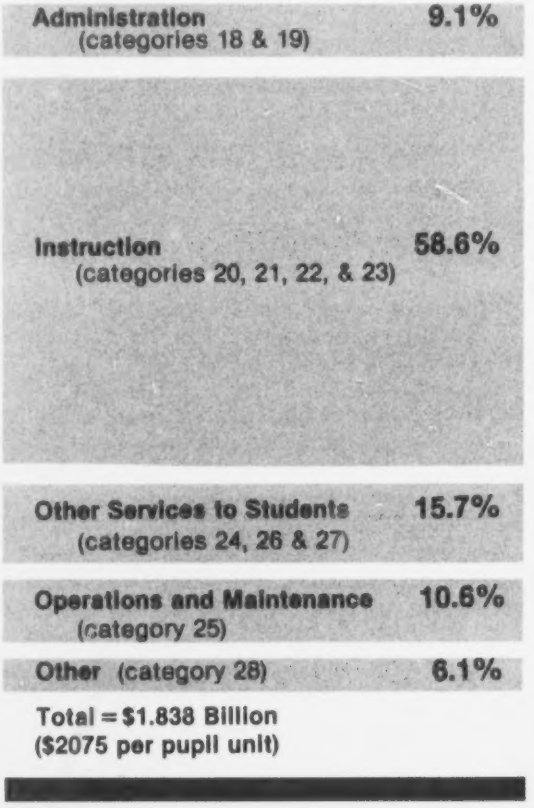
Table 4

Percentages of Minnesota Public School Revenue by Source

School Year	Federal	State	Local & Other
1972-73	6	53	41
1973-74	5	53	42
1974-75	5	54	41
1975-76	6	55	39
1976-77	5	54	41
1977-78	6	52	42
1978-79	6	52	42
1979-80	6	52	42
1980-81	6	54	40

Figure 1

Summary of K-12 Operating Expenditures of Minnesota Public Schools, 1980-81



Administration (categories 18 & 19) 9.1%
Instruction (categories 20, 21, 22, & 23) 58.6%
Other Services to Students (categories 24, 26 & 27) 15.7%
Operations and Maintenance (category 25) 10.6%
Other (category 28) 6.1%
Total = $1.838 Billion ($2075 per pupil unit)

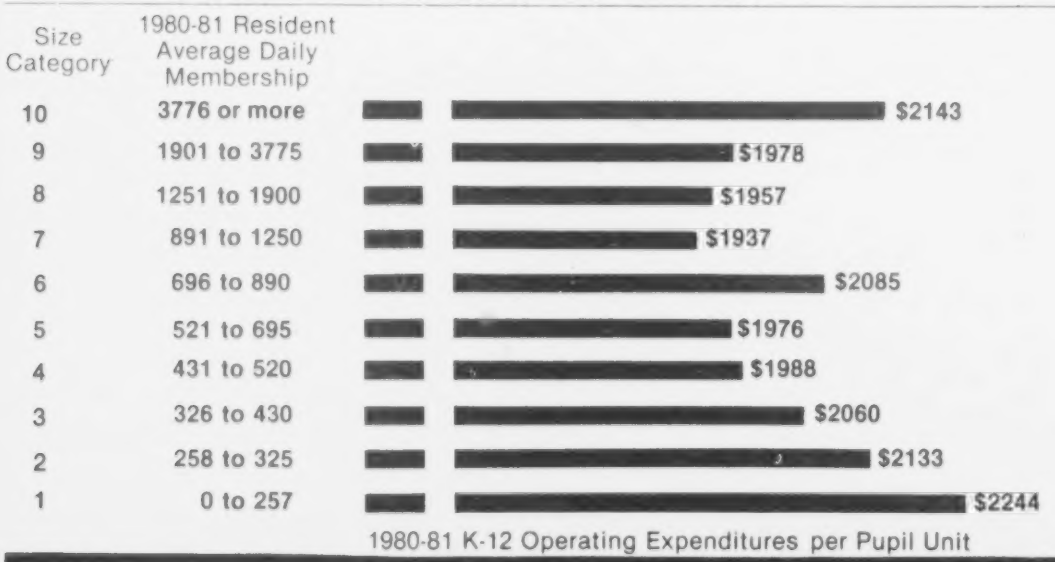
Table 5

K-12 Operating Expenditures of Minnesota Public Schools, 1980-81

Category (from tables on pages 10-39)	Expenditures Per Pupil Unit	% of Total
18. District and School Administration	$ 130	6.3%
19. District Support Services	59	2.8
20. Regular Instruction	918	44.2
21. Vocational Instruction	44	2.1
22. Exceptional Instruction	187	9.0
23. Instructional Support Services	67	3.2
24. Pupil Support Services	52	2.5
25. Operations and Maintenance	219	10.6
26. Food Service	120	5.8
27. Pupil Transportation	153	7.4
28. Other Operating Programs	126	6.1
29. Total K-12 Operating Expenditures	$2075	100.0%

Figure 2

K-12 Operating Expenditures per Pupil Unit, 1980-81 for Ten Enrollment Size Groups



There is wide variation among districts in expenditures per pupil unit; total K-12 operating expenditures varied from a low of $1626 per pupil unit to a high of $3868. However, over half of the school districts spent between $1850 and $2150 per pupil unit.

Figure 2 shows the relationship between district size (measured in average daily membership) and the amount of K-12 operating expenditures per pupil unit. In general, the smallest and largest school districts spent more per pupil unit than other districts. Of the ten size categories shown in Figure 2, operating expenditures were highest in categories 1 and 2 (districts with 325 or fewer students) and category 10 (districts with 3776 or more students). Expenditures were lowest for categories 4 and 5 (431 to 695 students) and 7 through 9 (891 to 3775 students).

Operating Fund Balances

Throughout the late 1970s, most Minnesota school districts spent slightly less money than they received, choosing to build up balances in their operating funds. Table 6 shows that this practice changed during

Table 6

State Totals of Change in Operating Funds Balance, per Pupil Unit, 1976-1977 to 1980-81

School Year	Change in Funds Balance, Per Pupil Unit
1976-77	+ $3
1977-78	+ 47
1978-79	+ 50
1979-80	+ 54
1980-81	- 8

NOTE: The change in operating funds balance is essentially the difference between revenues and expenditures, for the four operating funds combined.

1980-81. For the state as a whole, operating fund expenditures exceeded revenues by $8 per pupil unit. While this is a very small proportion of all school district spending, it suggests that school district budgets were tighter in 1980-81 than in the preceding three years. Half of the state's districts spent more than they received in the four operating funds; there were 39 districts in which expenditures exceeded revenues by more than $150 per pupil unit.

Property Valuation

Figure 3 shows that the state total of EARC valuation per pupil unit grew from $25,861 in 1979 to $31,004 in 1980, an increase of nearly 20 percent. This was the largest increase in the last eight years. Since 1972, EARC per pupil unit has nearly tripled.

For individual districts, the 1980 EARC valuation per pupil unit varied from a low of $93 to a high of $117,710. There were 33 districts under $15,000, and 31 districts above $60,000, or more than four times as high. These variations are important because they affect the districts' ability to raise local tax revenue to pay for new school buildings or enhanced programs. A high-valuation district can raise a given amount of revenue with a lower tax rate than that required for a low-valuation district.

Figure 3

State Totals of EARC Valuation per Pupil Unit, 1972 through 1980

The tables on pages 16 through 45 contain 38 separate statistics for each school district, county, and region in the state. Definitions of these 38 statistics are given below. All data are for the 1980-81 school year.[1]

1980-81 Resident Average Daily Membership

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be *in attendance* to be counted in ADM, but they must be *in membership* (i.e., currently enrolled in the district). For example, a pupil who is enrolled for the entire school year counts as 1.0 ADM; a pupil who is enrolled for exactly half the school year counts as 0.5 ADM.

The ADM counts in this report are, more specifically, counts of *total resident ADM*. They include all district residents who were enrolled in their home district, plus residents who were educated in other districts and for whom the home district paid tuition. Resident ADM counts are used in calculating foundation aid payments and property tax levy limitations.

1. **Prekindergarten Handicapped**—ADM of prekindergarten students enrolled in special education programs.
2. **Kindergarten**—ADM of students enrolled in kindergarten classes.
3. **Elementary, Grades 1-6**—ADM of students enrolled in grades 1-6, including students in elementary-level ungraded and special education classes.
4. **Secondary, Grades 7-12**—ADM of students enrolled in grades 7-12, including students in secondary-level ungraded and special education classes.
5. **Total**—Total ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Pupil Data

6. **Percent Minority**—The percentage of the district's students who are of American Indian, Alaskan, Black, Asian, or Hispanic origin.
7. **Percent Attendance**—The average ratio of days attended to days enrolled, for all students in the district.
8. **Percent Transported**—The number of public school students transported to and from school twenty or more days, as a percentage of the district's total enrollment.[2]

Professional Staff

These statistics provide information about each district's professional staff. Staff are counted in full time equivalents (FTE). For example, a full time staff member is counted as 1.0 FTE; one employed only half time is counted as 0.5 FTE. Staff counts include only elementary-secondary personnel; post-secondary teachers and administrators are excluded.

9. **Total Staff FTE**—The total number of licensed professional staff employed by the district, measured in full time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.
10. **Pupil-Staff Ratio**—The average daily membership of all students (both residents and nonresidents) who were enrolled in the school district, divided by the number of professional staff (column 9).[3]

Tax Rates

These figures show the rates of school district property taxes payable in 1981. Tax rates, which are measured in mills, are computed by dividing the district's tax levies by the total valuation of property, and then multiplying times 1,000.

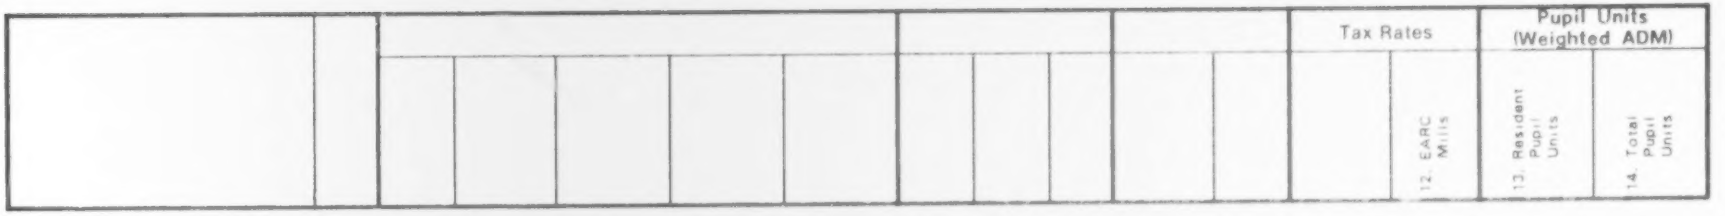
11. **Auditor Mills**—The actual tax rate of the school district, as determined by the county auditor. If the auditor tax rate is 50 mills, then a property owner would be taxed $50 for each $1,000 of assessed value. Because of differences in local property assessment practices, comparisons of auditor tax rates among districts may be invalid.

---

[1] The two tax rate statistics and the 1980 EARC value are not directly applicable to any particular school year. The tax rates are for taxes payable in calendar year 1981 and the EARC value is for calendar year 1980.

[2] In previous issues of *School District Profiles*, this figure was computed based on average daily membership (ADM) rather than enrollment. The change was made because enrollment is a more valid figure to compare with the number of students transported. The specific enrollment count used was the district's gross enrollment of students served. For most districts, this change in computation results in a slight reduction in the percent transported. (For the state total, the reduction is approximately 4.5 percent).

[3] In previous issues of *School District Profiles*, the pupil-staff ratio was computed by using the number of students in membership on October 1. This year the average daily membership of students served was used, because it is the best available indicator of the district's average enrollment throughout the entire year. This change has almost no effect on the state total pupil-staff ratio. However, for some districts the ratio shown in this report may be slightly different than it would be under the previous method.



12. **EARC Mills**[4]—the EARC mill rate is computed by multiplying the district's auditor tax rate times the 1980 market sales ratio. The market sales ratio is essentially the estimated average ratio of the market value (as determined by local assessors), to the actual selling price, for taxable property in the school district. Market sales ratios are generally less than 1.0, so each district's EARC mill rate is less than its auditor mill rate. Market sales ratios are compiled by the State Department of Revenue, and formally published by the Equalization Aid Review Committee, or EARC.

    This technique is intended to partially compensate for differences in assessment practices. Thus, when comparing tax rates among districts, it is more valid to use EARC tax rates than auditor tax rates.

Pupil Units (Weighted ADM)

13. **Resident Pupil Units**—This figure is computed by applying weightings to the district's resident average daily membership (ADM), which is shown in columns 1 through 5. Each kindergarten ADM counts as 0.5 pupil units; each prekindergarten, kindergarten handicapped, and elementary ADM counts as 1.0 pupil unit; and each secondary ADM counts as 1.4 pupil units. Resident pupil units are used in calculating the district's state foundation aid payments and property tax levy limitations.
14. **Total Pupil Units**—This figure includes the district's resident pupil units (column 13) plus the weighted ADM of two other groups of students: 1) students who reside in other districts but are enrolled in this district[5], and 2)nonpublic school students who attend the public school part-time for specific classes or services[6].

Revenue Percentages

These three columns show the percentage of each district's revenues from the federal government, the state government, and local and other sources. The percentages are based on all 1980-81 revenue reported by each district, except for proceeds from sales of real property and equipment, insurance recoveries, sales of bonds, loans, and interfund transfers.

15. **Federal**—The percentage of revenues from the federal government.
16. **State**—The percentage of revenues from the Minnesota state government, including foundation aid, property tax credits that are paid to the school district, and all other state payments to school districts.
17. **Local and Other**—The percentage of revenues from local and other sources. This category includes revenues from property taxes, interest, rent, gifts, tuition and fees, sales of assets other than real property and equipment, payments from other school districts, and all other sources except for federal and state government.

1980-81 Expenditures Per Pupil Unit

Columns 18 through 33 show each district's 1980-81 expenditures in sixteen different categories, divided by total pupils units (column 14). Columns 18 through 30 include all expenditures for the indicated purpose, except capital expenditures.

Because of the introduction of a new financial reporting system, the expenditure categories in this report are different from those in previous issues of *School District Profiles*. Please see pages 4 and 5 for an explanation of the new reporting system, the differences between these expenditure categories and those used last year, and some possible problems with the data. The definitions below are general descriptions of the sixteen categories. For a specific list of the fund and program codes included in each category, see Table 1 on page 5.

18. **District and School Administration**—Expenditures for the school board and for the offices of the superintendent, principals, and any other administrators who supervise principals.
19. **District Support Services**—Expenditures for central office administration that is not directly related to instruction, pupil support (see #24), or community services (see #30). Examples include expenditures for business services, data processing, legal services, personnel office, printing, and school census.
20. **Regular Instruction**—Expenditures for elementary and secondary classroom instruction, not including vocational instruction (#21) and exceptional instruction (#22), and for cocurricular and extracurricular activities. Examples include salaries of teachers, classroom aides, and coaches, and expenditures for classroom supplies and textbooks.
21. **Vocational Instruction**—Expenditures in elementary and secondary schools for instruction that is related to job skills and career exploration. Examples include expenditures for home economics, industrial, business, agriculture, and distributive education.
22. **Exceptional Instruction**—Expenditures for instruction of students who, because of atypical characteristics or conditions, are provided educational programs that are different from regular or vocational instructional programs. Examples include expenditures for special instruction of students who are educationally deprived, gifted and talented, or mentally retarded; for students with physical, hearing, speech, and visual impairments; and for students with special learning and behavior problems.

---

[4]For districts in the Twin Cities area which are members of a special intermediate vocational-technical district (districts 287, 916 and 917), the EARC mill rate in column 12 includes a small additional tax rate for the special intermediate district. This additional tax rate is not included in the auditor mill rates, nor is it included in the county, region, or state EARC mill rates.

[5]In computing total pupil units, students who are residents of one school district but attend school in another district are counted in both districts, if the resident district pays tuition to the district attended. In 1980-81 there were 9,010 students (5,600 pupil units) in this category. Thus the state total of pupil units in column 14 of this report includes some double counting. This measure of pupil units is used because it provides the most valid comparison with expenditures. If these students were counted only in their resident district or only in the district attended, the expenditures per pupil unit would be unrealistically high in the other district.

[6]These nonpublic school students, often called "shared time" students, were not included with total pupil units in previous issues of *School District Profiles*. For the state as a whole, they represent only 1759 pupil units, which is less than 9.2 percent of total pupil units. In a few school districts, however, they make up a significant share of total pupil units. For these school districts, the inclusion of shared time students causes an increase in total pupil units, and a slight decrease in all categories of expenditures per pupil unit (columns 18-33, and column 36).

	Revenue %			1980 – 81 Expenditures per Pupil Unit																Other Measures per Pupil Unit				
	15. Federal	16. State	17. Local and Other	18. District and School Admin.	19. District Support Services	20. Regular Instruction	21. Vocational Instruction	22. Exceptional Instruction	23. Instructional Support Services	24. Pupil Support Services	25. Operations and Maintenance	26. Food Service	27. Pupil Transportation	28. Other Oper. Program	29. Total K-12 Operating Expenditures	30. Community Service	31. Capital Outlay	32. Building Construction	33. Debt Service	34. Operating Funds Balance	35. Change in Funds Balance	36. State and Local Oper. Costs	37. Long Term Debt	38. 1980 EARC Value

23. **Instructional Support Services**—Expenditures for activites intended to help teachers provide instruction, not including expenditures for principals or superintendents. Examples include expenditures for assistant principals, curriculum development, libraries, media centers, audio-visual support, staff development, and computer assisted instruction.
24. **Pupil Support Services**—Expenditures for all non-instructional services provided to students, not including transportation and food. Examples include expenditures for counseling, guidance, health services, psychological services, and attendance and social work services.
25. **Operations and Maintenance**—Expenditures for operation, maintenance, and repair of the district's buildings, grounds, and equipment. Examples include expenditures for custodians, fuel for buildings, electricity, telephones, and repairs.
26. **Food Service**—Expenditures for the preparation and serving of meals and snacks to students.
27. **Pupil Transportation**—Expenditures for transportation of students, including salaries, contracted services, fuel for buses, and other expenditures.
28. **Other Operating Programs**[7]—Includes all operating expenditures that were not charged to any other category (columns 18-27).
29. **Total K-12 Operating Expenditures**—The total of the eleven preceding categories of expenditures (columns 18 through 28). This figure includes all expenditures incurred for the benefit of elementary and secondary education during the 1980-81 school year, except capital and debt service expenditures.
30. **Community Services**—Expenditures for recreation, civic activities, adult education, early childhood education, or similar programs which are not conducted primarily for elementary and secondary students, and for noncredit summer school programs.
31. **Capital Outlay**—All expenditures for acquisition or replacement of assets that have benefits for more than one year, except expenditures for construction of new buildings and additions (see #32). Includes expenditures for purchase of land and equipment, for remodeling and improvements to existing buildings, and for leasing of equipment and buildings.
32. **Building Construction**—Expenditures for construction of new buildings and additions, including payments to contractors, costs of advertising for contracts, architects' and engineers' fees, costs of paint and decorating, costs of equipping new buildings, and all other related costs.
33. **Debt Service**—Expenditure for repayment of long term debt (see #37), including payments of principal and interest on bonds and loans.

Other Measures Per Pupil Unit

34. **Operating Funds Balance**[8]—This figure is a measure of the district's financial condition at the end of the 1980-81 school year, and of how much money is available to be used in future years. It is computed as follows:

    Sum of the unappropriated fund balances on June 30, 1981, from the four operating funds (general, food service, pupil transportation, and community service funds),
    Minus the amount of statutory operating debt,
    Plus the appropriated fund balance for current use of taconite payments,

    All divided by 1980-81 resident pupil units (column 13).
35. **Change in Funds Balance**[9]—The difference between the district's operating funds balance on June 30, 1981 (see #34 above) and on June 30, 1980, divided by 1980-81 resident pupil units. This is essentially equal to the difference between the district's 1980-81 revenues and expenditures, for the four operating funds combined. Thus, a negative number indicates that the district spent more than it received in the operating funds.
36. **State and Local Operating Costs**—This figure, also called adjusted maintenance cost, is often used to compare costs of education among districts. It is essentially the net cost per pupil unit of education that is financed through state and local funds. Many districts use it to determine how much tuition they will charge to nonresident students. It is computed as follows:

    Sum of all expenditures for current operation of the schools (doesn't include expenditures for transportation, community services, capital outlay, building construction, or debt service),
    Minus all revenue from the federal government,
    Minus revenue from sale of food and materials,
    Minus admission fees and gate receipts from school activities,

    All divided by 1980-81 total pupil units (column 14).
37. **Long Term Debt**[10]—The amount of long term debt outstanding on June 30, 1981, divided by 1980-81 resident pupil units. Long term debt includes general obligation bonds, capital loans, debt service loans, construction loans, and loans from the state.
38. **1980 EARC Value**—The 1980 adjusted assessed valuation of the district, as published by the Equalization Aid Review Committee (EARC), divided by 1980-81 resident pupil units. This figure is an indicator of the district's ability to raise revenue through local property taxes.

[7] Some school districts included all expenditures for employee benefits in the same programs as the employees' salaries. Thus, for example, health insurance for the superintendent is included with "district and school administration" (column 18), and benefits for teachers are included with instructional programs (columns 20, 21 and 22). Other districts reported all expenditures for employee benefits separately; for these districts, the expenditures show up in "other operating programs" (column 28). Because of this difference in accounting practices there is wide variation in the amounts reported in column 28.

[8] In previous issues of *Profiles*, this figure was called the "unappropriated operating funds balance." However, for twenty school districts which received taconite payments under Laws of Minnesota for 1978, Chapter 746, the figure in column 34 include the unappropriated fund balances plus the amount appropriated for current use of taconite payments (balance sheet account 417). The column heading was changed to reflect this distinction, but the figure is computed exactly the same as in previous issues.

[9] For the twenty districts mentioned in footnote #8, the figure in column 35 is $20 to $30 lower than the change in the *unappropriated* operating funds balance per pupil unit, which is published in some other Department of Education reports.

[10] In previous issues of *Profiles*, this figure was called "bonded debt."

The figures listed on the next six pages are, for each county, totals for all school districts that have their central offices in the county. Totals are also listed for the state's thirteen development regions and for the entire state. Counties are listed by region, with the regions in numerical order. The map on page 15 shows region and county boundaries.

Totals for ECSU Regions

The state legislature has set up nine Education Cooperative Service Units (ECSUs), each serving a region of the state. The figures below are totals for each of the ECSU regions. The boundaries of the ECSU regions are the same as the boundaries of the development regions (see map on page 15), with the following exceptions: ECSU region 1 contains development regions 1 and 2, ECSU region 6 contains development regions 6E, 6W, and 8, and ECSU region 7 contains development regions 7E and 7W.

Data for Elementary-only & Nonoperating Districts

Unlike the other 432 districts listed in this report, the five districts in the table below do not directly operate both elementary and secondary schools. The first three districts (Nett Lake, in St. Louis County; Pine Point, in Becker County, and Winsted, in McLeod County) operate elementary schools, but their secondary students are transported to other districts. The other two districts (Franconia, in Chisago County; and Prinsburg, in Kandiyohi County) directly operate no

Totals for Enrollment Size Groups

The tables below list totals for all districts in each of ten enrollment size groups, based on 1980-81 resident average daily membership (ADM). For example, group 1 includes all districts with 257 or fewer ADM, and group 2 includes all districts with 258 to 325 ADM. Each group

Group No.	Number of Students (1980-81 Resident ADM)	1980–81 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates		Pupil Units (Weighted ADM)

schools, but contract with other districts for the education of their resident students.

Because of their unique structures and functions, it may be misleading to compare these districts to the elementary-secondary districts in this report. Data for these five districts are not included in the Summary Statistics on pages 46 and 47 or in the county, region, and state totals on pages 38 through 43.

contains approximately ten percent of the state's school districts (i.e., 42 to 44 districts).

The chief purpose of this table is to permit easy comparisons of districts with similar enrollments. For example, a superintendent in a district with 500 pupils may want to examine the totals for group 4 (431 to 520 ADM), to see how his or her expenditures compare with other districts that are about the same size.

Summary Statistics

The table below lists a variety of summary statistics for each of the 38 variables included in this report. The definitions at the right explain the meaning of these summary statistics.

This table may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 7) varies little among districts, from a low of 85.7 to a high of 97.2. Ninety percent of the school districts are within the narrow range of 93.5 (5th percentile) to 96.4 (95th percentile) By contrast, percent transported (column 8) varies greatly, from a low of 20 to a high of 100.

The table may also be used to see how an individual school district compares with other districts in the state. Three examples illustrate this use of the data.

1. A district which has total K-12 operating expenditures (column 29) of $2,000 per pupil unit is very near the median value, which is $2,002. Thus, about half the districts in the state have lower expenditures and half have higher expenditures.
2. A district with a pupil-staff ratio (column 10) of 6.9 could see from this table that they have the lowest pupil-staff ratio in the state.
3. A district with total average daily membership (column 5) of 340 students is between the 20th and 25th percentiles for this variable. Thus, between 20 and 25 percent of Minnesota school districts have fewer students than this district.

Definitions

Lowest value—For any specific variable, the lowest value of that variable among all 432 school districts. For example, the lowest EARC mill rate (column 12) for a Minnesota school district is 9.64 mills. The table also shows the *highest value* for each variable.

XXth percentile—For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total staff (column 9) is 21; this means that approximately 10 percent of the school districts have fewer than 21 staff members, and 90 percent of the districts have more than 21 staff. The 25th and 75th percentile are also called *quartiles*; the 10th, 20th, 30th, . . . through 90th percentiles are also called *deciles*.

Median—For any specific variable, a value chosen such that half of the school districts are below the chosen value, and half are above. For example, the median number of resident pupil units (column 13) is 817. This means that half the school districts have fewer than 817 resident pupil units, and half have more than 817.

State total—For variables 1-5 (1980-81 resident average daily membership), 9 (total staff), and 13-14 (pupil units), the state total is simply the sum of the corresponding value for all 432 districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by the sum of the denominators. For example,

$$\text{State total pupil-staff ratio} = \frac{\text{State total of pupils}}{\text{State total of staff}}$$

For these variables, the state total is a form of weighted average.
